Factsheet Information for exhibitors 2025

Scan code to understand Exhibition Details

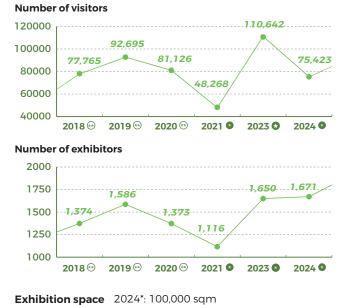

electronica China is the leading trade fair for the electronics industry in Asia. It provide the industry with more display options and opportunities, as well as more participation from related application fields. More application demos for vertical industries will be included to create a cross-industry platform that is helpful to the entire industry chain from product design to application. More than ten forums focusing on cutting-edge topics in vertical industries will also be held during the exhibition, covering electric vehicles, automotive electronics, third-generation semiconductors, embedded systems, artificial intelligence and computing power, industrial IoT, energy storage, smart manufacturing, medical electronics, connectors, automotive wiring harnesses, and motor drives.

Planet e: for a successful future

- Comprehensive range of products and services
- Leading business platform: high quality of buyers and decisionmakers in upper management who are preparing for and conducting business transactions
- From components to systems, applications and services: everything here revolves around the world of electronics
- Technical forums with prominent speakers: topics covering automotive, power electronics, medical technology and connectors

Exhibitor statements

electronica China attracted more visitors and exhibitors this year. This signals to us that we can find some economic recovery from the perspective of the exhibition. We are satisfied with electronica China this year because it has a wider visitors and better results. We will continuously participate in electronica China, a high-end and well-reached exhibition! Since 2014/15, we have been committed to increasing exhibits displayed at electronica China and will participate in the exhibition next year!

Olaf Scale, CEO (Germany) Rosenberger Asia Pacific Electronic Co., Ltd.

I believe this year's electronica China is larger in scale compared to previous years, with more overseas exhibitors. This is very beneficial for promoting the industry's development. At the same time, I saw many new generation products launched by emerging domestic semiconductor peers at this exhibition. We also focused on the new products introduced by our overseas partners and the level of innovation and progress made by major industry players. The platform provided by electronica China is very attractive to us, and we look forward to meeting everyone again at the next show in April!

Steve Si Senior Sales Manager (United states), Qorvo

This year, I feel that there are more exhibitors compared to last year, and the enthusiasm of our industry peers is very high. In addition to exhibiting, electronica China also brought us related forums and interviews, allowing us to further understand new trends in the industry and market. The influence of electronica China in the industry is growing, and we will increase our support and participation in the show!

> Chengjun Zhou Senior Marketing Manager (Germany) Infineon Technologies Co., Ltd.

The number of visitors and exhibitors can manifest how popular the current electronica China is. The scale, level, and visitors' engagement of the electronica China have been significantly improved. After being held for years, electronica China has enjoyed popular support, and many leading enterprises in industrial application would choose to participate in the exhibition. We hope to continue cooperating with electronica China in the future!

> Zhen Zhu Marketing Manager of Industrial Automation Industry (United States) ADI

Today is the first day of electronica China, and the crowd is bustling. As a grand event in the electronics industry, various sectors are showcasing their top products and presenting their future product plans. Our customers are also actively participating in the show, exploring the development trends of upstream supply chain products. Over the years, we have consistently participated in electronica China, hoping to establish better communication and exchange models with our peers and customers through this exhibition, discussing the future development of the industry, product forms, technical challenges, and potential cooperation opportunities. We hope to promote the exploration and exchange with customers and industries through this exhibition. With the acceleration of Al product iteration, we hope to bring more and updated product research and development through the platform of electronica China every year!

Haohan Chen Business Director (China) Luxshare Precision
